DAILY LESSON LOG

S.Y. 2025–2026

Date: June 23–27, 2025 Quarter: 1 Week: 2

LEARNING AREA/LEVEL: Mathematics 8

Teacher: JERIC T. SAING

| Section and Time | Monday | Tuesday | Wednesday | Thursday | Friday |
|------------------|--------|---------|-----------|----------|--------|
| saing | 1 | 1 | 1 | 1 | 1 |
| Section and Time | 2 | 2 | 2 | 2 | 2 |
| Section and Time | 3 | 3 | 3 | 3 | 3 |
| Section and Time | 4 | 4 | 4 | 4 | 4 |
| Section and Time | 5 | 5 | 5 | 5 | 5 |

| I. OBJECTIVES: | DAY 1 | DAY 2 | DAY 3 | DAY 4 | DAY 5 |
|--------------------------|---|---|---|---|---|
| A. Content Standards | The learners demonstrate knowledge and understanding of: 1. d 2. d | | | | |
| B. Performance Standards | By the end of the quarter, the learners are able to: 1. d 2. d | | | | |
| C. Teaching Philosophy | To achieve the goals of these lessons, the best teaching philosophies to utilize are constructivism and progressivism. | | | | |
| D. Learning Competencies | competency | competency | competency | competency | competency |
| Learning Objectives: | The learner should be able to: a. recognize the concept of b. write the c. participate actively in class discussion. | The learner should be able to: a. recognize the concept of b. write the c. participate actively in class discussion. | The learner should be able to: a. recognize the concept of b. write the c. participate actively in class discussion. | The learner should be able to: a. recognize the concept of b. write the c. participate actively in class discussion. | The learner should be able to: a. recognize the concept of b. write the c. participate actively in class discussion. |
| II. CONTENT | Multiplying and Dividing Simple Monomials and Deriving the Laws of Exponents | Multiplying Monomials and Binomials Using the Distributive Property | Using Special Product Patterns to Multiply Binomials | Factoring Polynomials with a Common Monomial Factor | Factoring Polynomials as Difference of Two Squares |

| | | | | | |
|--|---|--|--|--|--|
| III. LEARNING RESOURCES | List the materials to be used in different days. Varied resources of materials sustain children's interest in learning the lesson. Ensure that there is a mix of concrete and manipulative materials as well as paper-based materials. Hands-on learning promotes concept development. | | | | |
| References | | | | | |
| A. 1. Teacher's Guide | Printed Materials | Printed Materials | Printed Materials | Printed Materials | Printed Materials |
| 2. Learner's Material | Worksheets | Worksheets | Worksheets | Worksheets | Worksheets |
| 3. Textbook | Worksheets | Worksheets | Worksheets | Worksheets | Worksheets |
| B. Other Learning Resources | Teacher-made exercises | Teacher-made exercises | Teacher-made exercises | Teacher-made exercises | Teacher-made exercises |
| IV. PROCEDURES | | | | | |
| A. Reviewing Previous Lesson or Presenting New Lesson | Simple recall through Socratic questioning about Adding and Subtracting Simple Monomials. | Simple recall through Socratic questioning about Multiplying and Dividing Simple Monomials and Deriving the Laws of Exponents. | Simple recall through Socratic questioning about Multiplying Monomials and Binomials Using the Distributive Property. | Simple recall through Socratic questioning about Using Special Product Patterns to Multiply Binomials. | Simple recall through Socratic questioning about Factoring Polynomials with a Common Monomial Factor. |
| B. Motivation | Flashcards: Operations on Integers. | Flashcards: Operations on Integers. | Flashcards: Operations on Integers. | Flashcards: Operations on Integers. | Flashcards: Operations on Integers. |
| C. Development of the Lesson: Presenting Examples/Instances of the Lesson | <p>The teacher will explain the concepts and procedures in the lesson.</p> <p>Lesson 1.5: Multiplying and Dividing Simple Monomials and Deriving the Laws of Exponents</p> <p>Monomial: An algebraic expression with only one term. Examples include $4x$, $-3y^2$, and 7.</p> <p>Multiplying Monomials: To multiply monomials, multiply the coefficients (numbers) and add the exponents of like bases. For example, $3x^2 \times 2x^3 = 6x^5$.</p> <p>Dividing Monomials: To divide monomials, divide the coefficients and subtract the exponents of like bases. For example, $\frac{10x^5}{2x^2} = 5x^3$.</p> <p>Laws of Exponents:</p> <ul style="list-style-type: none"> $a^m \times a^n = a^{m+n}$ (Product of Powers) $\frac{a^m}{a^n} = a^{m-n}$ (Quotient of Powers) $(a^m)^n = a^{mn}$ (Power of a Power) | <p>The teacher will explain the concepts and procedures in the lesson.</p> <p>Lesson 1.6: Multiplying Monomials and Binomials Using the Distributive Property</p> <p>Binomial: An algebraic expression with two terms. Examples include $x + 2$, $3y - 5$, and $2a + 4b$.</p> <p>Distributive Property: A property that allows you to multiply a single term by each term within parentheses. For example, $3(x + 4) = 3x + 12$.</p> <p>Multiplying Monomials with Binomials: Use the distributive property to multiply the monomial by each term in the binomial. For example, $2x(3x + 4) = 6x^2 + 8x$.</p> <p>Multiplying Binomials with Binomials: Apply the distributive property twice, or use the FOIL method (First, Outer, Inner, Last) to multiply the terms. For example, $(x + 3)(x + 2) = x^2 + 2x + 3x + 6 = x^2 + 5x + 6$.</p> <p>Multiplying Binomials with Trinomials: Use the distributive property.</p> | <p>The teacher will explain the concepts and procedures in the lesson.</p> <p>Lesson 1.7: Using Special Product Patterns to Multiply Binomials</p> <p>Square of a Binomial:</p> $(a + b)^2 = a^2 + 2ab + b^2$ $(a - b)^2 = a^2 - 2ab + b^2$ <p>Example: $(x + 3)^2 = x^2 + 6x + 9$</p> <p>Product of the Sum and Difference of the Same Terms:</p> $(a + b)(a - b) = a^2 - b^2$ <p>Example: $(x + 4)(x - 4) = x^2 - 16$</p> | <p>The teacher will explain the concepts and procedures in the lesson.</p> <p>Lesson 1.8.1: Factoring Polynomials with a Common Monomial Factor</p> <p>Factoring: the reverse process of getting the product of any number or algebraic expression.</p> <p>Factoring Polynomials: describing an algebraic expression as the product of two or more expressions</p> <p>Common Factor: a factor that is contained in every term of an algebraic expression</p> <p>How to Factor a Polynomial with a Common Monomial Factor</p> <ol style="list-style-type: none"> Factor out the greatest common monomial of all terms of the given expression. Divide each term of the expression by the greatest common factor. The resulting expression is the other factor. | <p>The teacher will explain the concepts and procedures in the lesson.</p> <p>Lesson 1.8.2: Factoring Polynomials as Difference of Two Squares</p> <p>Perfect Square: When a polynomial is multiplied by itself, then it is a perfect square.</p> <p>Difference of Two Squares: a squared polynomial subtracted from another squared polynomial</p> <p>Formula: The factored form of a polynomial that is a difference of two squares is the sum and difference of the square roots of the first and last terms.</p> <p>In symbols,</p> $a^2 - b^2 = (a + b)(a - b)$ <p>or</p> |

|---|--|--|--|---|--|
| Developing Mastery | The teacher will demonstrate how to answer the first three items in the Practice Exercises. Some students will be called to show their solutions on the board. | The teacher will demonstrate how to answer the first three items in the Practice Exercises. Some students will be called to show their solutions on the board. | The teacher will demonstrate how to answer the first three items in the Practice Exercises. Some students will be called to show their solutions on the board. | The teacher will demonstrate how to answer the first three items in the Practice Exercises. Some students will be called to show their solutions on the board. | The teacher will demonstrate how to answer the first three items in the Practice Exercises. Some students will be called to show their solutions on the board. |
| D. Application (Group or Individual Activity) | Seatwork: Answer the remaining items in the Practice Exercises. Practice Exercises 1.5 Simplify each of the following expressions by multiplying or dividing the monomials. 1. $3x^2 \times 4x^3$ 2. $5y^4 \times 2y^2$ 3. $6a^3 \times 3a$ 4. $8m^5 \times m^2$ 5. $9p^2 \times 2p^3$ 6. $\frac{10x^6}{2x^2}$ 7. $\frac{15y^4}{3y^2}$ 8. $\frac{12a^5}{4a^2}$ 9. $\frac{18m^3}{6m}$ 10. $\frac{20p^7}{5p^3}$ | Seatwork: Answer the remaining items in the Practice Exercises. Practice Exercises 1.6 Simplify each of the following expressions by using the distributive property to multiply the monomials, binomials, or multinomials. 1. $4x(x + 5)$ 2. $3y(2y - 7)$ 3. $2a(a + 3b)$ 4. $5m(2m - 4)$ 5. $(x + 2)(x + 6)$ 6. $(3y - 4)(y + 2)$ 7. $(2a + 5)(a + 3b)$ 8. $(4x - 3)(2x + 7)$ 9. $(x + 1)(x^2 + 2x + 3)$ 10. $(2y - 5)(y^2 + 4y + 1)$ | Seatwork: Answer the remaining items in the Practice Exercises. Practice Exercises 1.7 Use the special product patterns to simplify the following expressions. 1. $(x + 5)^2$ 2. $(y - 3)^2$ 3. $(2x + 7)^2$ 4. $(3y - 4)^2$ 5. $(a + 6)^2$ 6. $(m - 8)^2$ 7. $(x + 4)(x - 4)$ 8. $(2y + 3)(2y - 3)$ 9. $(5a + 2)(5a - 2)$ 10. $(3m + 7)(3m - 7)$ | Seatwork: Answer the remaining items in the Practice Exercises. Practice Exercises 1.8.1 Factor the following polynomials completely. 1. $3x + 6$ 2. $12x^4 + 8x^3y + 4x^2y^2$ 3. $3x^3 - 6x^2 + 3x$ 4. $6y^3z + 7y^2z^2 + 2yz^3$ 5. $12x^3 + 9x^2y + 6xy^2$ 6. $2x^3 - 8x^2 + 4x$ 7. $12x^4 + 18x^3y + 6x^2y^2$ 8. $35x^3 - 7x^2 + 14x$ 9. $8y^3z + 16y^2z^2 + 24yz^3$ 10. $18x^3 + 9x^2y + 36xy^2$ | Seatwork: Answer the remaining items in the Practice Exercises. Practice Exercises 1.8.2 Factor the following polynomials completely. 1. $36x^2 - 64$ 2. $16x^4 - 49y^2z^2$ 3. $4a^2 - b^6$ 4. $81m^4n^2 - 9z^6$ 5. $a^4 - 16b^2$ 6. $16m^8 - 81b^4$ 7. $c^4 - 1$ 8. $x^4y^2 - 36z^6$ 9. $x^4y^2 - 49$ 10. $16m^4 - 64$ |
| E. Wrap up 1. Generalization 2. Giving of instructions on students' assigned tasks | Search and study about Multiplying Monomials and Binomials Using the Distributive Property. | Search and study about Using Special Product Patterns to Multiply Binomials. | Search and study about Factoring Polynomials with a Common Monomial Factor. | Search and study about Factoring Polynomials as Difference of Two Squares. | Search and study about Factoring Perfect Square Trinomials. |

|--|---|---|--|--|---|
| F. Evaluation | In a sheet of paper, answer the Activity. Activity 1.5 Simplify each of the following expressions by multiplying or dividing the monomials. 1. $2x^3 \times 5x^2$ 2. $4y^3 \times 3y^4$ 3. $7a^2 \times 2a^3$ 4. $9m^4 \times 2m^3$ 5. $8p^5 \times p^2$ 6. $\frac{14x^5}{7x^2}$ 7. $\frac{21y^6}{3y^3}$ 8. $\frac{16a^4}{4a}$ 9. $\frac{24m^2}{8m}$ 10. $\frac{30p^8}{10p^4}$ | In a sheet of paper, answer the Activity. Activity 1.6 Simplify each of the following expressions by using the distributive property to multiply the monomials, binomials, or multinomials. 1. $2x(3x + 4)$ 2. $5y(4y - 6)$ 3. $3a(a + 2b)$ 4. $6m(3m - 5)$ 5. $(x + 3)(x + 4)$ 6. $(2y - 5)(y + 3)$ 7. $(3a + 4)(a + 2b)$ 8. $(5x - 2)(3x + 6)$ 9. $(x + 2)(x^2 + 3x + 1)$ 10. $(3y - 4)(y^2 + 5y + 2)$ | In a sheet of paper, answer the Activity. Activity 1.7 Use the special product patterns to simplify the following expressions. 1. $(x + 4)^2$ 2. $(y - 2)^2$ 3. $(3x + 5)^2$ 4. $(2y - 6)^2$ 5. $(a + 7)^2$ 6. $(m - 9)^2$ 7. $(x + 3)(x - 3)$ 8. $(3y + 2)(3y - 2)$ 9. $(4a + 1)(4a - 1)$ 10. $(5m + 6)(5m - 6)$ | In a sheet of paper, answer the Activity. Activity 1.8.1 Factor the following polynomials completely. 1. $15xy + 6y$ 2. $18x^3 + 8x^4y + 14x^2y^3$ 3. $6x^4 - 15x^2 + 18xy$ 4. $12y^3z + 15y^2z^2 + 3yz^4$ 5. $15x^3 + 10x^2y + 5xy^2$ 6. $6x^4 - 9x^2 + 12xy$ 7. $14x^3 + 7x^4y + 49x^2y^3$ 8. $5x^4 - 15x^2 + 20xy$ 9. $18y^3z + 45y^2z^2 + 36yz^4$ 10. $12x^4 - 8x^2 + 28xy$ | In a sheet of paper, answer the Activity. Activity 1.8.2 Factor the following polynomials completely. 1. $4x^2 - 49y^2$ 2. $a^2 - 100$ 3. $y^8 - 16z^4$ 4. $y^4 - 1$ 5. $25m^2 - 9$ 6. $144x^6 - 100y^4$ 7. $a^2b^4 - 121$ 8. $x^6y^2 - 49z^8$ 9. $x^2y^4 - 64$ 10. $36m^6 - 81$ |
| H. Reinforcement or Remediation Activity | Assignment: Review the lesson and prepare for seatwork. | Assignment: Review the lesson and prepare for seatwork. | Assignment: Review the lesson and prepare for seatwork. | Assignment: Review the lesson and prepare for seatwork. | Assignment: Review the lesson and prepare for seatwork. |
| VI. REMARK/AN-NOTATION (Write a remark every day whether the objectives have been attained or not). | Objectives have been Attained: _____ Not attained due to _____ | Objectives have been Attained: _____ Not attained due to _____ | Objectives have been Attained: _____ Not attained due to _____ | Objectives have been Attained: _____ Not attained due to _____ | Objectives have been Attained: _____ Not attained due to _____ |
